Secure Your Information with Optimised Print Services + bizhub SECURE

WORKFLOW EFFICIENCY + DATA PROTECTION

Optimised Print Services + bizhub SECURE

Data is the most valuable asset in the company which may contain intellectual property rights, confidential information, personal records and business insights and it can also be vulnerable to theft. Companies may spend millions on security technology but often neglect the data that are resided in the Multi-Function Printers which contain hard drive storing images of documents printed, scanned, copied and emailed. With sensitive and confidential data being resided in the hard drive, it poses potential security loopholes.

At Konica Minolta, we offer **Optimised Print Services with bizhub SECURE**, to help ensure that your company information receives the highest possible security protection while managing the print environments through consulting, hardware and software implementation.

By right-sizing the document output fleet to actual business needs and providing optimal business process and fleet support to increase productivity. We will design and implement IT and information security solutions, from user authentication and data-safe hard disk handling of disposed devices to security requirements while implementing environmentally friendly document-related hardware and business workflows.

Five essential areas of OPS concept:

| Fleet | Process | Finance | Security | Green |

Konica Minolta bizhub SECURE is an industry-leading security solution provides a set of enhanced password and data security measures to prevent unauthorised usage and data extraction of the hard drive. It conforms to international standards.This additional layer of security measures help to lock down and protect any document data that may reside on the internal hard drive. It guards against possible MFP security leaks, ensuring your reliable security protection.
