# Cyber Secure
## PLATFORM

# STOP CYBER ATTACKS
## BEFORE IT REACHES YOUR NETWORK

The global cyber landscape has evolved, cyber threats are on the rise and becoming more and more sophisticated. Vulnerability in the systems has been exploited by unethical hackers, hence, millions of personal information had been stolen, creating a debilitating impact on the economy.

With the proliferation of the Internet, businesses are constantly being targeted by various modes of cyber attacks worldwide. Organisations are encouraged to invest in cyber security solutions to protect their businesses, especially since the impact of a cyber attack can be greater than the cost of getting protected in the first place. With **Konica Minolta CyberSecure Platform**, we provide multi-featured defence in a box which helps organisations to mitigate cyber threats instantly.

ELIMINATES UP TO 90% OF INCOMING CYBER THREATS (TOR, DGA, IP, AND MORE)

OPERATES IN STEALTH MODE

FULL IN-LINE RATE DETECTION

FASTER RECOVERY TIME FROM ZERO-DAY ATTACKS
